READING PLUS

WHAT

Reading Plus is an online adaptive EdTech programme which aims to improve pupils' reading comprehension, silent reading fluency and vocabulary.

It gets our students reading while closely monitoring their progress.

READING PLUS

WHY

Reading is everything.
If students can't read, they can't access the curriculum.
This programme is *one* strand of our approach to literacy.

"In fact, reading for pleasure is more likely to determine whether a child does well at school than their social or economic background." (Pearson)

READING PLUS

WHY

- Students have a choice of texts which are aligned to their interests and attainment level.
- The programme uses a guided window to support fluency and reduce cognitive load - supporting reading with automaticity so students can devote cognitive resources to information processing and construction of meaning.
- Reading Plus identifies gaps in learning via diagnostic assessment and provides personalised follow up activities eg, visual skills and supports teachers to see which pupils need additional support.
- Reading Plus gives all students the opportunity to access reading, while developing their vocabulary.

READING PLUS

HOW

- 3 times per week, during Tutor Time
- Project the book slide
- Start the timer, read for 20 minutes
- Students independently complete 4 reading lessons and 1 vocabulary lesson throughout the week (1 English lesson is also given to Reading Plus)
- Teachers can use their dashboard to support.
